## 1st Custom Software

- Custom software to make your small business more efficient
- Custom software priced specifically for small businesses
- Software solutions customized for your small business needs

### Small Business Custom Software Development

We're a small business working for small businesses. We can't afford expensive solutions for our company, and neither can you. We understand how small businesses operate. Our company has developed automated solutions for common small business tasks such as:

- Optimizing routes
- Consolidating information
- Tracking inventory and/or special parts requests
- Scheduling equipment and personnel resources
- Copying and sending documents and invoices
- Data entry and re-entry

### Custom Software Benefits: Fast - Affordable - Easier

Since we already have the experience of creating software solutions for small businesses, we can take this work and our knowledge and produce results for you quickly. Custom software can assist your small business in these areas:

- Internal organization - streamline various internal processes
- Business strategy - specific solution may be required for specific relationships
- System integration - compatibility between existing & new with web interface
- Software lifecycle - longer lifecycle than off-the-shelf & greater flexibility

### When Custom Business Software Makes Sense

- Can rationalize costs
- Can afford a long-term investment
- Can spare adequate development lead-time
- Can increase your company's operational efficiency
- Cannot find an off-the-shelf alternative
- Need application specific software

Clients

I used to have to spend hours searching for a particular invoice that was misplaced, but now I can just 'click' and it's there. The software makes the business information more accurate.

Alex Batenko, AMTEC

Testimonials

- Software lifecycle is too short
- Off-the-shelf alternative costs 30-40% less
- Off-the-shelf applications are adequately customizable
- Lack the necessary in-house bespoke software support expertise
- Do not have resourced for training staff on customized software

To create our software solutions, we will use the software that you currently own, if it makes sense to do so, or recommend low-cost software packages that we have successfully used with other customers.

Organizations appear to be subject to the law that governs sharks: If a shark does not move, it cannot breathe. And it dies. Moving organizations tend to keep moving. Dormant ones tend to run out of air and die. Act like a shark. Keep moving. [Ask us](#) about how Custom software will give you more air to breath.
